CHEMICAL INDUSTRY

# Always reacting to changes the right way

BE-terna Chemical: The ERP solution packed with benefits

Software systems that are quick, powerful and ready to go at all times are essential for companies today. Process automation is a big help when it comes to reacting flexibly to market conditions and legal guidelines.

With our ERP solution for the chemical industry, we have put together a complete business software solution for you, which will support you in any situation and can always be relied on.

THE RIGHT BLEND FOR YOUR SUCCESS

Make use of our expertise and the benefits of the Microsoft Dynamics 365 platform that's had worldwide success. Our ERP solution for the chemical industry offers a range of different functions, precisely tailored to the needs of your industry.
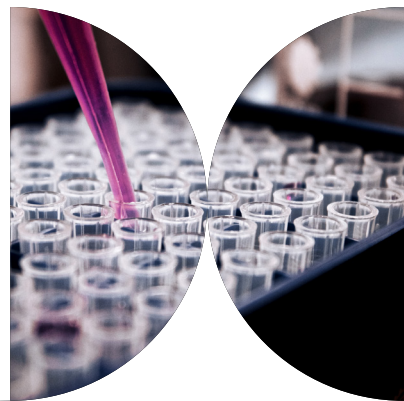

SIMPLE PRODUCTION PLANNING AND CONTROL

Manage your production and make changes flexibly!

- **Consider variable factors** such as raw material quality, shelf life, mixing ratio or process parameters, temperature and humidity thanks to formula-oriented production control
- **Use** the comprehensive range of standard functions of batch-oriented bulk production
- **Simplify the adjustment of formulas** to the actual quality of a batch and the required fillers using constituent management
- **Benefit** from fast connection of scales and mixer controls
- **Ensure** the quality standards of your production with **"In-process control"**

COMPLETE SUPPLY CHAIN MANAGEMENT

Automate and accelerate your supply chain!

- **Maintain a complete overview** of the traceability of all input materials within your production chain at all times - from the raw material supplier to the end customer, you're on top of everything
- **Benefit from reliable hazardous materials and dangerous goods management** along the whole of your supply chain
- **Ensure the quality** of your processes with the integrated module for assessing suppliers
- **Stay flexible** when planning and controlling transport
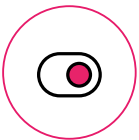

HOLISTIC REGULATION AND SAFETY MANAGEMENT

Our solution will help you fulfill legal regulations:

- **Use the comprehensive raw material and preparation database** with ChemGes integration
- **Check compliance** with legal requirements such as REACH, ADR, IATA, IMDG, etc. in the system itself
- **Make it easier** to calculate VOC balances and comply with prohibitions on mixing and storing goods together
- **Quickly create** legally compliant safety data sheets and dangerous goods labels directly from the system
- **Automate** preparation of operating instructions

Our business software solution gives you the perfect mix to sustainably digitalize your processes, optimize supply chains and ensure quality assurance throughout the value chain, thanks to the use of supplier assessments, testing plans and audit trails.
